Index

1 Introduction

This document's aim is to describe Device Tree application, which means that it will present application's goals and specifications and can also be used as:

3   User Guide

3.1   *The user interface menus*

The device tree application provides the following functions:

- View / mTidy(nc)Tja5.dtonbdtes
- View spectrum and image attributes

3.2.1.6   Contents of a control panel

For now it's possible to drop on the Control Panel:

> 1 State widget representing the state of the Device (For the user, it will be represented by the fact that the name of the device takes the color of its state, see Tango colors)
>
> 1 Attribute widget for each attribute (User will also see the attribute's quality's color, in "value" field, see Tango colors)

Note: for 0 Td (r)Tj 3.36 0 Td (i)Tj 2.880
